The year 2023 has finally ended, no doubt, it was a difficult year for the business community as we were facing with dearth of gas, water and other basic necessities. However, in spite of all these odds, business community did excellent by delivering the goods and keep rolling the wheel of economy.

As we know, we are facing with many challenges, first and foremost, is the rate of markup which is hovering at around 22% coupled with high inflation rate, exorbitant rise in energy charges resulting in non competitiveness in the region. I urge the people sitting at the helm of affairs to make policies, which would facilitate industry to work in congenial atmosphere.

I offer my sincere compliments to office bearers of KATI for their unflinching efforts to promote trade and industry.

From the Desk of President

Faraz ur Rehman

We are delighted to share with you the remarkable progress that KATI has undertaken to strengthen the sewerage system within the Korangi Industrial Area. These accomplishments demonstrate our commitment to ensuring a sustainable and robust infrastructure that supports the development of the industrial sector.

Korangi Industrial Area (KIA) is a renowned industrial hub in Pakistan that contributes to the nation's economy through its diverse range of companies and industries. The strategic location, availability of resources and skilled labor force make KIA an ideal location for businesses seeking to invest in the region.

KATI has implemented several initiatives to enhance connectivity and accessibility, making the region more appealing to businesses and investors. One of our key achievements involves the successful construction of Link Avenues 1 and 2, strategically implemented to enhance the sewerage system of the Korangi industrial region.

In our ongoing efforts to uphold infrastructure excellence, we have diligently undertaken the cleaning of the 48 - inch Dia sewerage line in sector 15. This initiative not only ensures uninterrupted flow but also mitigates potential disruptions, showcasing our proactive approach to maintaining the industrial ecosystem.
